## Medallia's Subprocessors

To support delivery of software and professional services, Medallia, Inc. (or one of our Medallia Subsidiaries used for Tech Support and Infrastructure) may use data processors with access to certain customer data (each, a "**Subprocessor**"). This page provides important information about the identity, location and role of each Subprocessor. Terms used on this page but not defined have the meaning set forth in the master agreement or the superseding written agreement between the parties (the "**Agreement**").

The Subprocessors we engage with may change. To receive updates to this list, please sign up [here](#). If you do not wish to receive automatic updates via email, please check this page frequently for updates.

---
